

Appendix 1

Worksheet

Follow the instructions below.

1. Find five grassland plants in the field. Use a book of plants to determine their names and write them down.

.....

2. Take photos of plants, sign them (plant name, your name and surname) and send via e-mail to the teacher.
3. Choose one of the identified plants and draw it. Keep the rules of the biological drawing.

4. Use entomological net to capture any arthropod. Put it gently in a container with a magnifying glass and identify using a book of insects. Then, using a tablet, photograph it and let it out onto the meadow.
5. Draw the arthropod on the basis of the photo. Keep the rules of biological drawing.
