

Appendix 1

Worksheet

Group 1

Using the abstract and the Internet, follow the instructions below.

1. Explain how the Amoeba, Stupia, Fucus, Fern, Kalanchoe and Chlorophytum reproduce and describe how the body of the new organism develops in the case of Amoeba and Hydra.
2. Define the concept of asexual reproduction.
3. Look for information about mushroom propagation and then prepare a riddle on this topic.
4. Conduct observation of potted plants in the classroom. Point out those from copies that reproduce asexually and explain the process with their example.
